

### Product – Information

### UV Wash M

---

**Product -  
Description:**

Powerful UV-Cleaner

**Application area:**

Removes different types of UV inks quickly and thoroughly from rubber blankets and cylinders. Can also be used for cleaning of screen rollers. Suitable for LED UV inks.

**Features:**

Quick and thoroughly cleaning  
Compatible with water  
No content of chlorinated hydrocarbons or aromatic compounds  
Low odour.

Density: approx. 0,9  
Colour: colourless  
Flashpoint: >65°C

**Use instructions:**

Automatic cleaning:  
Follow instructions of the wash program.

Manual cleaning:

Blanket:

Put the wash on a clean damp cloth and clean quietly with long strokes to give the solvent time to penetrate the ink and paper related deposits. Repeat if necessary. As a last cleaning step use pure water to obtain a fast drying of the rubber surface.

Inkrollers:

Use pure without water initially, use blade to remove the ink rests and use only water on a clean cloth to remove any remaining cleaner

**Units:**

10 x 1l, 10 l, 20 l cans; 200 l barrel

## Pentagon®

**Remarks:**

Shelf life 12 months after delivery. Not suitable for conventional rollers and blankets.

Please check the compatibility of mixini rollers and mixini blankets.
